# Claim - Evidence - Reasoning Model

#### Claim:

This is a statement of your understanding about a phenomenon or the results of an investigation that answers the original question and expresses what you are trying to help an audience understand and believe.

#### **Evidence:**

Cite data, observations and/or reports of empirical research others have done that support your claim.

### **Evidence:**

Cite data, observations and/or reports of empirical research others have done that support your claim.

#### **Evidence:**

Cite data, observations and/or reports of empirical research others have done that support your claim.

# **Reasoning:**

Explain how the evidence correctly supports your claim. Describe the scientific knowledge, theory, or scientific principle that applies to a particular claim and evidence.

## **Reasoning:**

Explain how the evidence correctly supports your claim. Describe the scientific knowledge, theory, or scientific principle that applies to a particular claim and evidence.

### **Reasoning:**

Explain how the evidence correctly supports your claim. Describe the scientific knowledge, theory, or scientific principle that applies to a particular claim and evidence.
