

The States of Matter Song

by Mrs. Morin

(sung to the tune: The Wheels on the Bus)

Aug 27-2:16 PM

The temperature of a solid goes up, up, up,

Up, up, up,

Up, up, up.

The temperature of a solid goes up, up, up.

Until the solid starts to MELT!

(and the temperature stays the same!

because the matter is changing states)

Aug 27-2:16 PM

The temperature of a liquid goes up, up, up,

Up, up, up,

Up, up, up.

The temperature of a liquid goes up, up, up.

Until the liquid starts to BOIL!

(and the temperature stays the same!

because the matter is changing states)

Aug 27-2:16 PM

The temperature of a gas goes down, down, down,

Down, down, down,

Down, down, down.

The temperature of a gas goes down, down, down,

Until the gas starts to CONDENSE!

(and the temperature stays the same!

because the matter is changing states)

Aug 27-2:16 PM

The temperature of a liquid goes down, down, down,
Down, down, down,
Down, down, down.

The temperature of a liquid goes down, down, down,
Until the liquid starts to FREEZE!
(and the temperature stays the same!
because the matter is changing states)

Aug 27-2:16 PM
